Mr John Puzey

53 Plantation Drive

Woking

CHRISTCHURCH Dorset

BH23 5SG

18 June 2007

Dear Mr Puzey,

Thank you so much for your recent donation of £258. Your generous gift will be put to work right away to help more people living with dementia and their carers and families. Please convey our many thanks to the members of New Milton & District Round Table 133 for their generosity.

Since we started in 1979 the Alzheimer's Society has made tremendous progress, thanks to people like you.

You might be surprised to learn that 25 years ago very few people had even heard of Alzheimer's Disease. Today, over 90 per cent of people in the UK are aware of it. The Society is now the leading care and research charity for people with Alzheimer's and other forms of dementia, and has touched thousands of lives along the way.

There are 750,000 people who have dementia and another 155,000 people develop it every year. The Society's branches and support groups have helped over 100,000 people. And our national helpline and website offer support and information to more and more people each day.

Once again, thank you. Through your support of our research projects, care services and awareness campaigns you're helping to improve the lives of people with dementia, their families and carers. And it's only because of the ongoing generosity of people like you that we can continue to make more progress in our fight and to provide hope for those living with dementia.

Yours sincerely

Supporter Care Team
